

Clinical Services

We have **two medical students on rotation** learning about college health and sports medicine.

Lab/X-Ray

A small, multi-disciplinary clinical team participated in a **Measles Update for HealthCare Partners Webinar** presented by IDPH and the State Hygienic Lab.

Physical Therapy

Physical Therapy is providing **clinical rotations** for two **athletic training** majors who are also considering physical therapy school. They will be able to obtain the **PT/ATC dual credential**.

Pharmacy

Prescription volume was **up 8.4%** this January from last year.

Communications

Student Health will be partnering with the **ISU Daily** on a campaign **promoting healthy relationships**.

Prevention Services

Lauri serves on the **Multicultural Competency Expectations and Training** subcommittee of the **VPSA Diversity Committee**, which prepared the **"Microaggressions"** presentation for the February 9th Division Meeting.

Administration

Completed and submitted the **mid-year budget report** to the VPSA office.

Health Information Management

The Medical Records department has started using **Fax Manager** for sending records to other clinics. This **eliminates printing and faxing paper copies**, and sends documents digitally instead.

National College Health Assessment

This information helps us develop prevention efforts that have the potential to impact many students on our campus.

—Lauri Dusselier, Manager
Prevention Services

On Monday, February 16th, Student Health sent out an email invitation to participate in the National College

Health Assessment survey to 7,500, or one – fourth, of undergraduates at Iowa State University via email. The assessment is sponsored by the **American College Health Association**.

The survey is designed to assess student health behaviors in order to provide better services and support for Iowa State University students. It is part of a larger study being conducted with other colleges and universities nationally.

cyclonehealth.org

Students may benefit by knowing that they have assisted in providing accurate information regarding health behaviors on your campus. The information will be used to develop health programs for our campus.

The survey collects information about topics such as **alcohol, tobacco,**

and other drug use, sexual health, weight, nutrition, exercise, mental health, personal safety and violence.

"This survey is important to Iowa State because the results will help us identify areas in which our students' behaviors are healthier than the national reference group, where we might be less healthy, the highest-risk behaviors, and the areas of greatest need." said Lauri Dusselier, manager of Prevention Services at Thielen Student Health Center. "This information helps us develop prevention efforts that have the potential to impact many students on our campus."
